Allowable Subject Matter

Applicant has incorporated the allowable subject matter of claim 16 into claim 1 and cancelled claims 17-20 insofar as they would no longer have been further limiting of claims 2-5 respectively.

The Examiner did not unearth any previously unseen references that are more relevant than was Emmerling or would serve to render obvious the claims as they now read. Blum et al., U.S. Patent # 6,762,241 and Stuart are mentioned as being of interest but neither represents a foundation for rejection alone or in combination with another reference.

The Examiner gave strong consideration as to whether a non-statutory type double patenting rejection over Roessler et al., U.S. Patent No. 6,809,170 was merited as a process that mirrors the present process in virtually every way is disclosed with the exception of the cyclization step. Although Schmalstieg, cited earlier, teaches this cyclization, there is no indication as to why this is particularly advantageous. Indeed, column 2, lines 12-21 state that the urethane polymers derived from the silane aspartates do not suffer from the same problems as do those derived from the more commonly used amino-functional silanes. That is to say, Schmalstieg does not motivate one of ordinary skill to add a cyclization step to the process claimed in the '170 disclosure.

Claims 1-15 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.
